Panama Backpack Drip Torch

Panama Backpack Drip Torch Replacement Parts

Less fatiguing than traditional drip torches! The 1-1/2 gallon steel tank is supported by 1- 1/2" wide adjustable straps. The 30" hose and 24" fire wand let you put fire where you want it. Fiberglass wick igniter. Streamlined burner assembly won't snag in bushes. Uses diesel or

stove oil. Safety features include loop in fire wand to prevent flashback, filler cap with a no-leak seal, vent valve that prevents pressure build-up, and "anti-spill" tubing that directs fuel from the vent valve back into tank. Regulator valve controls fuel flow.
