

1. Set up one stake and hook the first (unmarked) ring over it. Use the second ring (marked '50' for a 50 cm × 50 cm, '1' for a 1 m × 1 m, '2' for a 2 m × 2 m test pit) to determine the orientation of the test pit and the location of the second stake.

2. Hook the third ring (marked '50', '1', or '2') over the second stake. Use the correspondingly marked second ring to determine the location of the third stake.

3. Swap the first and third ring to determine the location of the fourth stake.

Note: The rings measure 35 mm (1³/₈ inches) in diameter.

Keep out of reach of children. This is not a toy.
